DETAILED ACTION

1. This application is a divisional of SN 10/017,969. All claims 1-32 stayed identical as originally filed.
- 2.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 11-18, drawn to X=C, Y=N, A1=C compounds, classified in class 546, subclass 152+. If this group is elected, claims 1-10, 25-30 reading on the elected compounds can be prosecuted together with the election.
- II. Claims 19-24, drawn to X=N, Y=C, A1=C, classified in class 546, subclass 138. If this group is elected, claims 1-10, 25-30 reading on the elected compounds can be prosecuted together with the election.
- III. Claims 1-10, 25-30, drawn to remaining compounds, classified in class 546-544, subclass various, depending on species election. If this group is elected, a further election of a single disclosed species not encompassed by groups I or II is also required. Further restriction based on the species election may be required.
- IV. Claims 31-32, drawn to intermediates and process of using, classified in class 546, subclass 229.

The inventions are distinct, each from the other because:

Compounds of groups I-IV differ in elements, bonding arrangement and chemical property for which no common core can be identified. The members of the recited variables represented by X, Y and A1 are so disparate chemically as not to be members of a recognized chemical class of compounds. The different core structure requires separate search and examination since each core differ to such an extend that a reference anticipating any of groups I-IV would not render the other groups obvious.

Should applicant traverse on the ground that the groups and/or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the groups and/or species to be obvious variants or clearly admit on the record that this is the case.

Art Unit: 1625

In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Celia Chang whose telephone number is 571-272-0679. The examiner can normally be reached on Monday through Thursday from 8:30 am to 5:00 pm.
